

Wolf Rotary Transfer Machines

Precision by the second.

Our second hand Wolf TSM 280

All machines
are in top
condition!

1. Wolf TSM 280 / second hand machine 1

- for post-processing of extruded parts
- incl. feeding system Kettmaster
- 9 horizontal machining units -> simultaneous machining: chamfering, turning, facing and drilling
- currently set up for pressure bars length 32,1 mm up to 80 mm
- 2,4 sec. / per piece

production example

2. Wolf TSM 280 / second hand machine 2

- for post-processing of blanks, for example extruded parts
- incl. feeding bowl for single-part production
- horizontal machining unit, horizontal threading unit, displacement unit and two hydraulic undercutting units
- suitable for machining parts \varnothing 3 mm up to 26 mm and length up to 80 mm

production examples
